OLIVE OIL DRIZZLER & OLIVE OIL DIPPING DISHES

*F*ill the carafe with your favorite olive oil to approximately half way up the neck of the bottle.

Place the Drizzle Straw into the carafe. Place your thumb over the thumb hole on top of the bubble handle and lift the Drizzle Straw out of the carafe. You may want to suspend the Drizzle Straw for a moment inside the carafe so that any excess oil on the outside of the Drizzle Straw can drip off into the carafe.

Place the drizzle end of the straw over your Olive Oil Dipping Dish or directly over your food and release your thumb from the top of the bubble handle. The oil will drizzle out of the drizzle end.

To stop the flow of oil, simply replace your thumb on top of the thumb hold.

The bubble handle on top acts as a stopper on the bottle when you are done with the oil.

Use your Dalla Piazza Olive Oil Drizzler for Balsamic Vinegar, too!

To clean, place carefully in the top shelf of the dishwasher.
